

High School

High Schools in New Hampshire offering classes in Family and Consumer Science provide a solid foundation of coursework, community projects, and student organizations where students can develop leadership, life and communications skills needed to become responsible citizens and leaders in their community, family, and work settings.

The sequence of courses that encourage students to build a depth of understanding and ability in an area of study are:

- Foods and Nutrition
- Early Child Development and Parenting
- Relationships
- Textile Apparel and Fashion
- Consumer Economics

For more extensive programs the National Standards for Family and Consumer Science education may be applied. (www.nasafacs.org).
